

Rochester Regional Breastfeeding Coalition
Meeting Agenda
February 19, 2015

Our mission: To improve the health of the Greater Rochester Region by promoting breastfeeding as the optimal feeding choice for infants through education, advocacy, collaboration, and increasing access to support.

Mantra (to be recited by all): *Our coalition exists to promote breastfeeding in our community, not to promote our individual contributions to breastfeeding. My contributions to this community are valuable. I will work to remain positive and open. I will seek to balance when I speak and when I listen. I recognize there is no "You should" but only "I will" in our coalition.*
